### Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ► On February 29, 2016, May 27, 2016, August 29, 2016, and November 28, 2016, the issuer made cash distributions of \$0.05 per share to common shareholders. The cash distributions are estimated to be in excess of the current and accumulated earnings and profits of the issuer.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ► The issuer is currently expected to have positive earnings and profits, while they have a deficit in accumulated earnings and profits. The cash distributions are expected to be in excess of the current earnings and profits, based on reasonable assumptions currently available. Of the total cash distributions, 83.0 percent is expected to be treated as a dividend and the remaining 17.0 percent is expected to be a return of capital. The return of capital will reduce shareholder basis to the extent thereof. Any distribution in excess of shareholder basis will be a capital gain to the shareholder.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ► See #15 above.

The issuer is currently expected to have positive earnings and profits and has a deficit in accumulated earnings and profits, where earnings and profits was computed in accordance with section 312.

**18** Can any resulting loss be recognized? ► N/A

**19** Provide any other information necessary to implement the adjustment, such as the reportable tax year ► The reportable tax year is 2016.
